Application to Request Data Deposit
Michigan Center for the Demography of Aging (MiCDA)
Geographic Linkage Repository (GLR)

Purpose: The MiCDA Geographic Linkage Repository facilitates research on the role of geographic factors in health and aging related processes. The GLR will house geographic data (e.g., at the neighborhood, zip code, county or state level) in the Michigan Center for the Demography of Aging Virtual Data Enclave. Approved researchers will be given access to GLR files for use in conjunction with restricted data from the Health and Retirement Study, Panel Study of Income Dynamics or the National Health and Aging Trends Study/National Study of Caregiving.

Instructions: To request data be deposited in the MiCDA GLR, please fill out this form and send to MICDAEnclave@umich.edu. Note: For depositors from outside the University of Michigan, a Data Transfer Agreement (DTA) signed by the depositor and an institutional representative is required. For materials from UM investigators, a Memorandum of Understanding (MOU) signed by the depositor is required. Before completing the DUA or MOU, we recommend that you first contact MiCDA to determine if materials are appropriate to be included in the repository. Please direct questions to MiCDAEnclave@umich.edu.
